Baby talk is a type of speech associated with an older person speaking to a child. It is also called caretaker speech, infant-directed speech (IDS), child-directed speech (CDS) or motherese.. Baby talk has a "cooing" pattern of intonation different from that of normal adult speech: high in pitch, with many glissando variations that are more pronounced than those of normal speech.

Foreword. With the publication of the Immunisation Handbook 2017 (the Handbook), it is once again appropriate to extend the Ministry of Health's thanks to everyone involved in supporting, promoting or delivering immunisations to the people of New Zealand. This Handbook has been designed as a comprehensive source of information on immunisation, to support you in the work you do.
