The blue whale (*Balaenoptera musculus*) is a marine mammal belonging to the baleen whale parvorder, *Mysticeti*. At up to 30 metres (98 ft) in length and with a maximum recorded weight of 173 tonnes (190 short tons), it is the largest animal known to have ever existed. Long and slender, the blue whale's body can be various shades of bluish-grey dorsally and somewhat lighter underneath.

Phylogeny. The whales are part of the largely terrestrial mammalian clade *Laurasiatheria*. Whales do not form a clade or order; the infraorder *Cetacea* includes dolphins and porpoises, which are not considered whales. The phylogenetic tree shows the relationships of whales and other mammals, with whale groups marked in green.
