magnetic field. The magnetic field points into the screen. 1) A positively charged particle is located at point A and is stationary. The direction of the magnetic force on the particle is: a) Right b) Left c) Into the screen d) Out of the screen e) Zero The magnetic force is given by $F = qv \times B$ but v is zero. Therefore the force is also zero.

Magnetic Fields and Forces AP Physics B. Facts about Magnetism Magnets have 2 poles (north and south) Like poles repel Unlike poles attract Magnets create a MAGNETIC FIELD around them. Magnetic Field A bar magnet has a magnetic field around it. This field is 3D in nature and often represented by lines
