Pathology and etiology of constriction. Identification of pericardial disease dates back to Biblical times, with observation of clinical signs attributable to CP harkening to the renaissance period, and modern understanding arising during the 19th century .CP is a pathological condition with encasement of the heart by a thickened, fibrous, and sometimes calcified pericardium, with secondary ...

A crystal oscillator is an electronic oscillator circuit that uses the mechanical resonance of a vibrating crystal of piezoelectric material to create an electrical signal with a precise frequency. This frequency is often used to keep track of time, as in quartz wristwatches, to provide a stable clock signal for digital integrated circuits, and to stabilize frequencies for radio transmitters ...

A metamaterial (from the Greek word  $\mu\epsilon\tau\alpha$  meta, meaning "beyond") is a material engineered to have a property that is not found in nature. They are made from assemblies of multiple elements fashioned from composite materials such as metals or plastics. The materials are usually arranged in repeating patterns, at scales that are smaller than the wavelengths of the phenomena they influence.
