

# Magnetic Resonance Spectroscopy Diagnosis Of Neurological Diseases.pdf

| TABLE OF CONTENTS  |    |
|--|----|
| ACKNOWLEDGMENTS  | 5  |
| LIST OF TABLES   | 6  |
| 1. INTRODUCTION  | 7  |
| 1.1 Background   | 8  |
| 1.2 Evolution of Missing Data Estimation Method            | 12 |
| 1.3 Missing Data Mechanisms                                | 13 |
| 1.3.1 Missing Completely at Random                         | 14 |
| 1.3.2 Missing at Random                                    | 15 |
| 1.3.3 Missing Not at Random                                | 16 |
| 1.4 Strategies to Manage Missing Data                      | 16 |
| 1.4.1 Case Deletion  | 16 |
| 1.4.2 List-Wise Deletion                                   | 17 |
| 1.4.3 Pair-Wise Deletion                                   | 18 |
| 1.4.4 Mean Substitution                                    | 20 |
| 1.4.5 Hot / Cold Deck Imputation                           | 21 |
| 1.4.6 Linear Regression Imputation                         | 22 |
| 1.4.7 Multiple Imputation                                  | 23 |
| 2. LITERATURE REVIEW                                       | 25 |
| 3. METHOD  | 26 |
| 3.1 Multiple Imputation                                    | 26 |
| 3.2 Procedure for Analysis                                 | 26 |
| 3.3 Theoretical Support/Validation for Multiple Imputation | 29 |
| 3.3 Advantages and Disadvantages of Multiple Imputation    | 31 |
| 4. RESULTS OF MONOTONE MISSING DATA PATTERN                | 34 |
| 4.1 Simulation   | 34 |

## [Magnetic Resonance Spectroscopy in Neurological Diagnosis](#)

Thu, 26 Jul 2018 05:46:00 GMT

Magnetic resonance spectroscopy diagnosis of neurological diseases. New York: Marcel-Dekker; 1999. Neurobiologic insights and clinical diagnoses come about from MRS in several ways: (1) Technology-driven, empiric method, which exploits the metabolite profiles (spectra) routinely obtained.

Magnetic resonance spectroscopy diagnosis of neurological ...

## [Proton Magnetic Resonance Spectroscopy for the Diagnosis ...](#)

Fri, 14 Sep 2018 20:10:00 GMT

This review focuses on the use of 1 H-MRS to study neurologic disease because the magnetic resonance (MR) sensitivity is much greater for protons than it is for phosphorus, and it therefore allows for greater spatial resolution, which is better suited for examining cerebral pathologic features.

## [Magnetic Resonance Spectroscopy – a non-invasive method in ...](#)

Wed, 23 Nov 2016 23:54:00 GMT

Magnetic Resonance Spectroscopy is a non-invasive method, which can be performed following a routine Magnetic Resonance investigation within the same examination, and can provide very useful molecular information related to the metabolism and function of the normal and pathological structures of the brain.
